Requirements for interactive session on
Spatial point processes

In order to get ready for session on spatial point processes, you may need the following information:

- Find and install the latest version of R from here

- Download and install the latest version of RStudio from here

- Open RStudio and install packages "spatstat.utils", "spatstat" and "maptools", you can use the following codes:

  1. install.packages("spatstat.utils")
  2. install.packages("spatstat")
  3. install.packages("maptools")

- We may need the latest unpublished version of "spatstat.utils" and "spatstat", you can install latest version from GitHub through following codes:

  1. require(remotes)
  2. install_github('spatstat/spatstat.utils')
  3. install_github('spatstat/spatstat')
  4. If you do not have "remotes" installed, you should first run
     install.packages("remotes")

- You may need to study some parts of Spatial Point Patterns: Methodology and Applications with R.

Sincerely
Open data for open cities team
